The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/628,414	Applicant(s) BARNETT ET AL.	
	Examiner MYRON G. HILL	Art Unit 1648	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2007.

DETAILED ACTION

This action is in response to papers filed 11/21/07.

Claims 1-34, 43-45, 51 and 55 are under consideration.

Formatted: Keep with next

Rejections Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34, 43-45, 51 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ganne (US 6251407) in view of Barnett et al. and Damaskus (US 3269905).

Applicant argues that Ganne does not teach frozen storage and that the claims have been amended to recite solid state.

The claims are drawn to a composition in the solid state wherein the phases are distinct from one another. Ganne has been previously discussed and teaches the components of the formulation.

Deleted: ¶

Ganne does not teach frozen vaccines.

Barnett et al. teach that concentrated stocks of viral antigen are stable for years when frozen (page 746, column 1, lower part).

Damaskus teach that stratiform packaging of material can be used to separate labile components (column 1, lines 50-68).

One of ordinary skill in the art at the time of invention would have known that freezing the composition in layer or discrete phases would enable the viral antigen to remain as a concentrated stock in the composition with adjuvant and optional diluent.

One would be motivated to formulate the frozen stock in one tube to save time in formulating vaccines as indicated in Barnett et al. to be able to vaccinate quickly when an outbreak of disease occurs (page 747, column 1, end portion of first full paragraph).

Thus, it would be prima facie obvious to freeze a vaccine composition of Ganne to maintain the potency of the antigen with the expectation of success knowing that frozen concentrated viral antigen retains its potency.

Conclusion

No claim is allowed.
